General Questions

For your information and Contacting Laureates

Dear Nobel Prize Organization,

We found 60% more Wealth at decoupling Labour from Finance, avoiding reward devaluation by inflation. We like to let you know this and discuss it with your related Nobel Prize Laureates to bring the workout and implementation to the right level, because this 60% more Wealth can mean a Global Agenda Shift: a New Financial Architecture. Presentations of this and related findings you will find at www.worldsustainabilityfund.nl.

Please will you bring us in contact with Peace, Economics, and maybe other Nobel Prize Laureates to deliberate the 60% more Wealth findings for the good of all?

Kind Regards,

Emile van Essen
